Galaxy Workflow ' bowtie2-alignment-pe-dataset-collection'

Step **Annotation**

Step 1: Input dataset collection

input
select at runtime

Step 2: Input dataset

input
select at runtime

Step 3: FASTQ Groomer

File to groom
Output dataset 'output' from step 1

Input FASTQ quality scores type
Sanger & Illumina 1.8+

Advanced Options
Hide Advanced Options

Step 4: Bowtie2

Is this single or paired library
Paired-end Dataset Collection

FASTQ Paired Dataset
Output dataset 'output_file' from step 3

Write unaligned reads (in fastq format) to separate file(s)
False

Write aligned reads (in fastq format) to separate file(s)
False

Do you want to set paired-end options?
No

Will you select a reference genome from your history or use a built-in index?
Use a genome from the history and build index

Select reference genome
Output dataset 'output' from step 2

Set read groups information?
Do not set

Select analysis mode
1: Default setting only

Do you want to use presets?
No, just use defaults

Save the bowtie2 mapping statistics to the history
False

Step 5: Flagstat

BAM File to report statistics of
Output dataset 'output' from step 4
